

## Elevated Generator Helpful Notes

- If the generator is being installed on an elevated stand, please notify the city.
- Provide the total height and width of the stand, including the generator, measured from grade level.
- The generator and its stand must not be visible above any existing fence or from the street. For example, if the fence is 6 feet tall, the combined height of the stand and generator must not exceed 6 feet. If the fence is 8 feet tall, the generator and stand must remain below 8 feet.
